

REAL-TIME INSIGHT INTO YOUR FLEET MOVEMENTS

Eliminate the need for constant dashboard refreshing, check-ins, and asset filtering with the Field Activity Dashboard. Engineered to give users a true real-time view and a live progress report into ongoing fleet activities at the click of a button. This powerful and easy-to-use dashboard is customizable to fit the specifics of your organization's activities, from plowing and grading to spraying, sweeping, gravelling, and more.

Especially useful for road and highway maintenance, snow removal fleets, and grading activities, users can stay on top of which routes and sectors have recently been serviced, which areas and routes remain, and the current location of each asset on the road - all from one real-time dashboard view.

Key Features

- Custom activity tracking based on speed or inputs
- At-a-glance live updates
- Configurable, easy-to-read live display

PRIMARY BENEFITS

- Review historical activity and movement
- Stay informed of real-time progress
- Efficiently plan and manage jobs and asset routes
