

## Get your people and your business back to work safely

Mitigate the risk of COVID-19 spread and safeguard your business with the Titan GPS FieldDocs Health Screening App. Quickly have employees and visitors self-assess when entering your building or worksite. Make informed decisions regarding immediate risk and record date and time for any future contact tracing requirements.

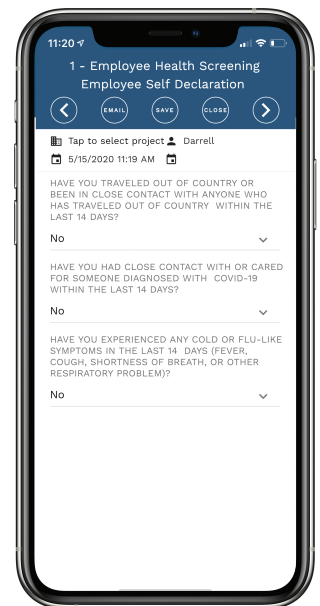

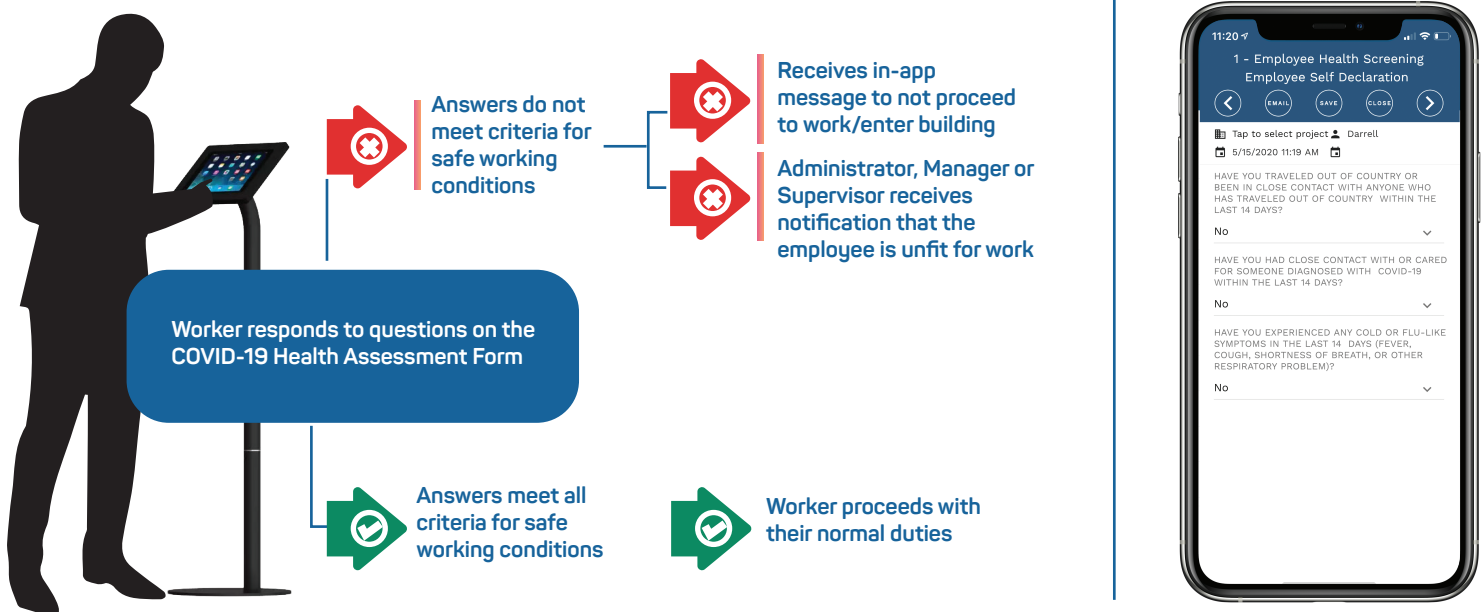

Available on any mobile device, the COVID-19 Health Screening App can be accessed on employee devices, or set up at mobile check-in stations and building entrances to minimize risk and keep everyone safe.

### Key Features

- In-app and back office notifications
- Private accounts and login information
- Configurable to regional or company mandates
- Create multiple forms for different areas
- Easy to use, update, and administer
- Private and secure records

### Primary Benefits

- Daily health screening of staff and visitors
- Identify immediate transmission risks
- Date and time stamped records for potential contact tracing requirements
