► BUILT FOR EXTREME ENVIRONMENTS

This diminutive yet rugged GPS tracking device is specifically designed for heavy equipment applications. Secure and maintain awareness of your valuable equipment assets in any environment!

This LTE Cat-1 cellular device has everything built-in and is compatible with the cellular networks built today.

The rugged IP66 rated case, 2-customizable inputs: 12 and 24 V and near-zero current draw make the TT3379WR mini an incredibly robust and flexible GPS tracking device when combined with the advanced features of the Titan GPS dashboard.

LOCATION AND EQUIPMENT STATUS MONITORING FEATURES

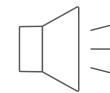

This advanced GPS tracking device is equipped with a built-in backup battery, disconnect alert and near-zero current draw in sleep mode, to protect valuable equipment batteries while still maintaining periodic reporting location, health, and status of equipment assets. The GPS and cellular antennas are built-in and one additional input to track PTO, cargo doors, sensors or any equipment status worth monitoring.
